

THE EMPRESS EXPRESS

VOLUME XV, No. 42

EMPRESS, ALTA. THURSDAY, Mar. 15, 1928

Price: \$2.00 Per Year

United Church

Church School, 2:00 p.m.
Interest attaches to the visit of Mr. Lapp, and the prospect of hearing him speak to the children.

Public worship, 7:30 p.m.
Empress is to be favored by a visit from Mr. Gordon Lapp, Boys' Work Secretary for Alberta. His message is of interest to every man and boy.

The choir will assist in worship by contributing the following numbers:

Invocation,
Anthem: "Pray for the Peace of Jerusalem."
Solo by Mrs. L. H. Shannon.
Duet, Miss Opal Boyd and Mrs. F. Goldie.
Vesper Evening Hymn.
Everybody welcome.
Rev. N. W. Whitmore,
Minister

Large Acreage In Oil Leases

A total of 9,708 leases covering 1,199,267 acres are held in Alberta according to the annual report of the Department of the Interior. Oil production from wells on these lands for the year ending March 31st, 1927, is given as 250,000 barrels with an estimated value of over one million dollars.

DOMINION CAFE

FIRST-CLASS MEALS

Offices: Royal Bank Building (Opposite Hotel)

ST. PATRICK'S TEA

Be sure to join us at St. Patrick's Tea, Apron and Night-dress Sale to be given by the Ladies' Aid Society in the Sunday School Room on Saturday, March 17th, at 3 p.m.

Alberta Fish and Game Association

Farmers and ranchers are co-operating with fish and game associations, already locally organized, for the purpose of forming an Alberta and Fish Game Association. The chief objectives of this provincial association will be the suppression of pests, such as crows, magpies, coyotes. The preparation of the recommendations which will advance the fish and game interests in their relations to farmers, ranchers and sports men, and the bringing of new game birds, such as Ring necked pheasants, which will do well in this province.

In this connection, the Calgary Fish and Game Association has already arranged to bring in 1000 pheasant chicks this summer to be set out in the Calgary district. Other associations are taking similar steps and it is indicated that there may be support from the provincial government in this respect.

In order to form a strong Alberta Fish and Game Association, it is desirable that local associations be organized throughout the province and all sports men in this district are urged to take an active part in accomplishing this end. Those who are interested, are invited to write to C. A. Hayden, President of the Calgary Fish and Game Association, who is looking after the preliminary work in connection with the forming of the provincial association.

Best temperatures for all year—a warm heart and a cool head.

Brooding and Feeding Of Baby Chicks

Brooding: The first consideration in brooding is a suitable building for the purpose. Prior to building a brooder house at the Scott Station a small shed-roof colony house served the purpose. This colony house was situated inside and the air spaces between the studding and rafters were packed with prairie wool. The floor was double boarded and the outside of the building was banked above the floor level with soil. A similar building could be used on the average farm. For the brooding of chicks in the early spring it is necessary to have a building which the wind will not penetrate in order to maintain an even temperature. The temperature near the floor and about three feet from the stove should be 95 degrees Fahrenheit during the first week. After this time if the stove is well regulated the chicks may serve as a thermometer by the way in which they move about. If they are well scattered the temperature is satisfactory but if they begin to draw near the stove or huddle together the temperature is too low.

The hard coal burning brooder stoves are used exclusively at the Scott Station with good satisfaction. During average weather in March or early April one hundred pounds of hard coal is usually sufficient

Motor School Attracts Good Attendance of Farmers

The J. I. Case tractor school held Thursday and Friday, March 8 and 9, drew a very fair attendance, despite indifferent weather conditions. Morning and afternoon sessions were held and slides were shown. Wm. Miller, J. I. Case expert explained the slides as they were thrown on the screen, the various mechanical troubles encountered and how to avoid and correct them. Mr. Miller was very thorough in his talk, going to much length to enlighten his audience on the various subjects under discussion. Much valuable information on tractors and other farm machinery was dispensed. It clearly proved the value to the farmers of these one day schools. Assistant Mgr. B. H. Tewkesbury of the J. I. Case Co., and J. C. Taft, were also present. The school was held under the auspices of the Empress Lbr. yards, and is the first one to be held in this district. A free dance on Friday night, was given by Mr. J. N. Anderson, Mrs. J. N. Anderson, piano; G. Russell, violin; J. McVill, saxophone, rendered an enjoyable brand of music. The dance was a merry one, and a fitting conclusion to a very successful event.

for a 500-chick brooder stove (for one week).

Feeding: The chicks are taken from the incubator on the 22nd day and nothing but water is given them for at least 48 hours. They are given some coarse feed to pick at before feeding. The first feed given is equal parts of finely cracked wheat, corn and hulls and fed dry on a smooth floor on a paper. The quantity given is one ounce per fifty chicks five times per day. At the end of the first week a dry mash is used to replace one of the five feeds each day. This mash consists of one part bran, one part shorts, one part chop, one part cereal, one half part beef scrap and one part bone meal. It is left before the chicks only a few minutes at first and longer each time until at the end of three or four weeks it is placed in a hopper where the chicks may take it at will. In addition to this mash cracked grain is fed in the litter twice per day. If a daily supply of milk is available the beef scrap may be omitted from the mash but the milk must be either sweet or sour every day and not alternating from one to the other. Fresh, clean water should be before the chicks at all times.—E. Van Nies, Dom. Exp. Station, Scott, Sask.

You will want to hear what Gordon Lapp, Alberta Boys' Work Secretary has to say to men and boys, particularly, but good for all parents and children at the United Church on Sunday evening. Special music.

Work on Rosemary Line

Between fifty and sixty men are engaged in the concrete construction work for the railway bridge at the Bull Pound, north of Rosemary. The Bull Pound is on the Red Deer River. The bridge piers are putting in the concrete piers, and this work will be completed before the river ice goes out in the Spring. E. H. Creelman has the contract for the work on the Bull Pound bridge. For the bridge at Rosedale, Duff, Flint and Co. are the contractors. Material for the Bull Pound bridge is being freighted overland from mile 13, the end of the steel on the line running north from Rosemary. Mile 13 is as far as the grading was completed out from Rosemary last Fall, when freeze-up came and the steel was laid to that point. As soon as weather permits in the Spring, grading will begin from Mile 13 right on to the bridge. Some of this work is now finished, but there are vacant stretches where there is no work at present.

Steam shovels are working on the grade along the river between the Bull Pound and Rosedale. This is nearly all heavy work, with deep cuts and fills, and most of it has to be done with steam shovels. Supplies for the crews doing the work are brought down from Drummheller on the river line, where the road is perfectly level and smooth as a concrete highway.—N. H. Bassano.

Land For Sale

The undersigned, in order to close an estate, will receive offers for the purchase of North Half of Section 25, Township 25, in Range 4, West of 4th Mer., containing 320 acres. All offers must be in writing and accompanied by accepted cheque payable to the undersigned for the full amount offered, and must be submitted on or before the 1st April, 1928. The highest or any other offer not accepted.

JOSIEH M. SIWA, P.O. Box 65, Estempe, Alberta, Executor of the Estate of the late Mrs. Kathleen Pawlak, deceased.

Big Attendance at United Church Musical Service

The Service of Praise in the United Church on Sunday evening last, attracted a very large attendance; the church being filled to capacity. The vocal renderings, solos, duets, quartets and anthems by the choir were exceptionally well given. The service was eloquent testimony to the musical ability of the choir leader, Mrs. T. Guldie. A musical service of such merit would be difficult to find in a town the size of Empress and many much larger. The offering (part from the envelope contributions) for the new musical instrument amounted to \$31.00.

Local Showing of New Ford

The New Ford is now on display at the N. D. Storey show-rooms. Many and varied are comments on the new car. In our own humble opinion, however, the Ford car is far ahead of the old model T. It is without apparent effort that the powerful motor generates a speed of 40 miles or more and the four wheel brakes perform in an unquestionable manner. Ride comfort is increased and big changes in appearance and a variety of other improvements make the new car a desirable possession.

In connection with the visit of Mr. Gordon Lapp, the Trail Ranges and Texas boys are planning to hold a Father and Son Banquet on Monday evening.

Remember the Printer. How about your subscription? See us for Clubbing Offers with newspapers and magazines.

For Sale or Rent

320 acres, 3 miles from Empress, 240 acres broken, fenced, good buildings, lots of water. Ideal for cattle or sheep. \$1000.00. Rent one-third.—Bassano, Empress, Alberta.

British Ace Sets World's Auto Record At 214 Miles Per Hour

Daytona Beach, Fla.—Captain Malcolm Campbell, British ace, established a new world's speed record when he drove his huge Napier Blasted Special over the hard beach course here at an average speed of 206.95602 miles an hour.

Literally burning up the sands with his giant machine equipped with a powerful 12-cylinder motor of the British Air Service, Captain Campbell exceeded by 3.16 miles an hour the former record of 203.79 set here last year by Major H. O. D. Segrave of England, in his mystery Submarine Special.

Taking a four-mile running start, Captain Campbell made his first run south with the wind negotiating the official miles in 16.5 seconds, setting a new record of 214.7913 miles an hour, which was 11 miles an hour faster than Major Segrave's record. On his return trip north, made against a strong wintery wind, the Englishman covered the official mile in 18.03 seconds, for a speed of 199.6722 miles an hour.

Captain Campbell declared the performance of his machine today proved to him he would need a longer running start if he should decide to make another attempt later to better his own mark.

"I did not have my machine open up at any time during the trial," he said. "When I entered the official mile stretch after taking a four-mile start, my machine was at full speed, started to pick up and it did not begin to pick up until I had covered half of the mile. Just before I crossed the final wire I glanced at my instruments and I was making 226 miles an hour. My instruments are accurate and I knew all during the runs just what speed I was making."

His average elapsed time, both ways over the course, was 17.395 seconds and his average miles an hour was 206.95602.

Immediately after he had crossed the wire at the end of the official mile, Captain Campbell narrowly escaped what might have been a serious accident when his huge speedster struck a soft bump on the sand and for a moment the driver almost lost control of his car. Swerving dangerously at such a tremendous speed, the machine, for an instant, seemed to head for the soft sand dunes, which undoubtedly would have resulted in the death of the Englishman and demolition of the car.

The bump, which was located higher on the beach than the Britisher had intended to drive, threw him half way out of the seat and for an instant his feet bounced completely off the brakes and accelerator. His goggles slipped down over his eyes, obstructing his vision, but he kept the machine and it roared on down the course, stopping near the end of the beach, four miles away.

Mrs. Campbell, witnessing the epochal run from the grandstand, gasped audibly when she saw her husband's car strike the bump, and she covered her face with her hands. Fearing a serious accident had happened, Mrs. Campbell did not look up until friends told her that her husband had completed his run safely.

Budget Summary

Some Details Of The Budget Presented By Minister Of Finance

Ottawa.—The high lights of the budget presented to the House of Commons by Hon. J. A. Robt, Minister of Finance:

Tax Reductions—Income tax, ten per cent. reduction in personal income tax. Tax rate on corporations cut to eight per cent.

Under the new income tax schedule, \$500 exemption will be allowed for mentally or physically incapacitated persons over 21 years of age.

Sales tax: Twenty-five per cent. reduction, i. e., rate cut from 4 to 3.

All tax reductions take effect Feb. 17, and reduction in income tax applicable to taxes payable on income has just been made.

Tariff Reductions: Cottons, material reductions in large range household cottons. Rates lowered on yarns. British preference widened.

Woolens: Duty reductions on mitts and all but more expensive lines of underwear, socks, stockings, yarns for weaving free. Preferential duty reduced on woolen goods imported in gray for dyeing and finishing.

British preference rates for finer grades reduced. Re-classification lines of flax and jute products.

Tobacco: Machinery: preference duty reductions. British preference duty reduced from 10 to 5; intermediate, 30 to 5.

Reductions in duty on press blankets, lime calcium chloride, for road treating, non-alcoholic preparations for disinfecting, etc.; crude petroleum for refining free till July 1, 1931; rates on parts for machine tools reduced; nickel chromium for making electric resistance wire free.

Drainage: 80 per cent. of certain kinds of mangrove paper.

Ninety per cent. on tubular goods for netting or exporting said.

Eighty per cent. on material used in manufacture of various tools when duty incurred in Canada.

Fifty per cent. on material used in aeroplane engines. After July 1 no drawback unless 40 per cent. of cost of production incurred in Canada.

Motor Cars Purchased

Ottawa.—Four hundred and sixty-one motor cars have been purchased by the Federal Government for its various departments since January 1, 1926, according to a return tabled in the House of Commons.

World Air Orientals

Ottawa.—W. F. Kennedy, Conservative member for North Ontario, has filed a resolution in the House to request the Federal Government to allow no more Orientals to enter the Dominion.

He pointed out that every year during the last 40 years an off-year for grain had resulted in requests for a change in the system of grading. It was undesirable that the number of grades be increased to any great extent and the matter should have careful consideration from Government experts who could be called before the agricultural committee.

E. J. Young (Liberal, Weyburn), asked the amendment.

John Vallance (Liberal, South Huron), in seconding the amendment, said he would have preferred consideration of the problem be delayed until the wheat growing season, but he would have preferred consideration from Government experts who could be called before the agricultural committee.

E. J. Young (Liberal, Weyburn), asked the amendment.

John Vallance (Liberal, South Huron), in seconding the amendment, said he would have preferred consideration of the problem be delayed until the wheat growing season, but he would have preferred consideration from Government experts who could be called before the agricultural committee.

Announce Closing Of Bonded Liquor Houses

Government To Cancel Licenses Says Minister Of Customs

Toronto.—A special despatch to the Chief of Police Ottawa says the announcement of one of the recommendations of the Royal Customs Commission, bonded export and import liquor warehouses, which have been found to be a source from which illicit liquor shipments across the United States border, are to be wiped out of existence.

"For the most part these enterprises are advantageously situated near the border line in Canada and according to the customs commission serve no legitimate or legal purpose whatever."

Hon. William D. Esler, Minister of Customs, made the announcement. The department will not grant any more such licenses and purposes, cancelling licenses already issued."

Halifax.—Halifax export liquor houses have received notice, it was stated by customs officials here, to dispose of their stocks on hand and to cease importations, although no time limit has been set. Vancouver and Halifax, it was further stated, are the only ports in Canada in which export liquor houses operate.

Brings Canada Big Revenue

Dominion Exporting Annually Rubber Products Valued At Thirty Millions

Montreal.—Today Canada has become the fourth rubber manufacturing country of the world and was now exporting rubber products to the value of \$30,000,000 annually, though the raw product came from countries to which the Dominion was exporting the manufactured commodity, declared Hon. James Macdonald, minister of trade and commerce, in an address at the annual luncheon of the Canadian Rubber Association here.

"The development of the rubber industry in Canada," the speaker continued, "is probably the best available illustration of the fact that where there is a need in a country for a commodity and therefore an extensive potential market, there the manufacture of that product will develop though it is necessary to transport the raw materials from the four corners of the globe."

Belgium recovers in full measure, and more than all, she has sacrificed; until the rights of the smaller nations of Europe are placed upon an unassailable foundation, and until the military domination of Prussia is wholly and finally destroyed."

Alberta Farmers Need Workers

Saltmont.—Men for spring work on the farms are now being arranged for by the provincial labor branch. It is expected at least 4,000 farm hands will be needed this year, and of these from 1,500 to 1,800 will be brought in from outside the province. Arrangements have been made for a supply of men with farm experience to come from British Columbia where a large number are said to be available from the rural labor branch. It is expected that the coming year will be a busy one for the provincial labor branch.

London.—The Air Ministry says will raise an attempt to gain for Britain the air altitude record. A secret plane which was built for the Air Ministry has been removed from Hull, where the effort originally was to be made, to South Farnborough. Air Service pilots will be at the controls. It is understood that an exceptionally well-trained pilot will be used. To beat the present record it will be necessary for the plane to ascend about eight miles.

London.—Earl of Asquith and Asquith's heir is 11-year-old Julian. Viscount Asquith, son of the former prime minister's eldest son, Raymond Asquith, who was killed in action while serving with the Grenadier Guards in the Great War.

Heavy Appropriation By Government For Experimental Farms

Suggests New Scheme To Secure Settlers

Sir Henry Thornton Advocates Higher Freight Rates To Obtain Funds

Toronto, Ont.—The raising of \$20,000,000 annually by increased freight rates on the part of both the Canadian National Railway and the Canadian Pacific Railway, to be administered solely in the prosecution of a vigorous immigration policy was a scheme which Sir Henry Thornton, chairman of the Canadian National Railway, outlined during a speech at a dinner of St. Andrew's Macdonald Lodge here. Sir Henry stated that if freight rates were increased on an average of five per cent, it would yield to both the C.N.R. and the C.P.R. an additional \$20,000,000 cash year. "If both railways joined hands in raising that fund for the encouragement of immigration," he declared, "we would make infinitely more progress in the future than in the past."

The speaker stated that there were 300,000 experienced farmers who would come to Canada, if they had partly prepared farms waiting them. He could bring these 300,000 experienced farmers here and other hundreds of thousands of boys and men from the United States, he declared. "That represents the kind of thing on which we ought to spend our money."

Passing Of A Great Statesman

Great Britain Mourns the Death Of Earl Of Oxford

Sutton Courtenay, Eng.—While eminent men and the press of Great Britain praised the Earl of Oxford's life of service and mourned his death, the body of the aged statesman, who died at his home here, was carried to the parish church of Sutton Courtenay.

Praise of the Earl of Oxford and Asquith as a great parliamentarian a forceful, gracious debator and an unselfish servant of the nation's welfare is contained in thousands of messages of condolence published in a review by his widow. All recall his activities in the early days of his career when as Prime Minister, he breathed the British spirit of confident courage in the face of Germany's seemingly irresistible advance when he, a native of London, England, came to Canada in 1914 and after teaching school in this province for some time, took up law. Until she recently left for Leeds she practised law for three years in California. A report of her appointment by the Outlook Club appeared in the Yorkshire Weekly Post, January 21.

Masses-Harris Buys U.S. Plant

Radio, Wis.—The J. J. Case Plant Works, one of Racine's pioneer industries and which since its inception in 1875 has developed into a multi-million dollar concern, was sold to the Masses-Harris Company, Ltd., Toronto, it was announced at the Case Company office. No announcement of the consideration was given.

Woman Pastors Favored

Ottawa.—Approval of the general principle governing the ordination of women to the ministry was given by the Ottawa Presbytery of the United Church of Canada in session here. The Presbytery, however, decided that at the present time it was not expedient to introduce the matter for adoption by the general council.

With View To Promoting Electrification Of Rural Areas

Winnipeg.—The establishment of a dozen electrical test farms in Manitoba is proposed by representatives of power, agricultural and manufacturing interests here, and a general committee, with D. L. McLean, Deputy Minister of Public Works, at its head, is considering the matter. The idea of the proposed electrical test farms is that this will be a step towards promoting the electrification of rural areas.

Finance Minister Makes A Substantial Cut In Income And Sales Tax

Ottawa.—Before packed galleries and an eager attentive House, Hon. J. A. Robt, Minister of Finance, submitted his fifth budget.

Last year Mr. Robt had a ten per cent. reduction in all personal income tax rates to announce. Recently he announced another ten per cent. reduction in income tax rates with exemption of \$200 to those supporting dependent over 21 years of age incapable of self-support on account of mental or physical infirmity.

He announced a reduction to eight per cent. in the tax on corporations. The present rate is 8.1 per cent.

He announced a reduction of 25 per cent. in the sales tax, bringing the rate down from four to three per cent.

He estimated his tax reductions would amount to \$19,000,000.

So far, Mr. Robt's taxation changes created little surprise, but in an hour later in the sales tax, his expectation was general that he would announce a reduction both in the ex-

ise duty on cigarettes and in the import duty on liquors. But in neither case had Mr. Robt any reduction to announce.

Triffit proposals cover a pretty wide field. Ounces, woolsens and textiles are reduced in all personal income tax rates to announce. Recently he announced another ten per cent. reduction in income tax rates with exemption of \$200 to those supporting dependent over 21 years of age incapable of self-support on account of mental or physical infirmity.

He announced a reduction to eight per cent. in the tax on corporations. The present rate is 8.1 per cent.

He announced a reduction of 25 per cent. in the sales tax, bringing the rate down from four to three per cent.

He estimated his tax reductions would amount to \$19,000,000.

So far, Mr. Robt's taxation changes created little surprise, but in an hour later in the sales tax, his expectation was general that he would announce a reduction both in the ex-

Ottawa.—A plea for the establishment of an experimental farm in the Sherbrooke district was made by James C. Brady (Conservative, Sherbrooke) when the House of Commons gave further consideration to estimates of the Department of Agriculture.

An appropriation of \$19,000,000 for experimental farms including necessary new buildings was before the House. Mr. Brady pointed out that large areas of farming land.

Mr. Brady was supported in his request by Hon. S. F. Tolmie (Conservative, Victoria), who said such a farm would encourage agriculturists in Central and Eastern British Columbia. The Conservative Government prior to 1921 had been considering the establishment of such a farm and would have gone on with it "had it not been for the action of the Liberal Party in defeating us."

A. M. Carmichael (Progressive, Kinsley), expressed the opinion that the experimental station located near Kinsley was perhaps doing more valuable work than had been done at the central farm at Ottawa. He believed it might be extremely beneficial to have more stations in pioneer districts.

W. G. McQuarrie (Conservative, New Westminster), urged this year's program should include work of the Fraser Valley district as the best and most economical way of clearing land in the Fraser Valley district. He expressed more farmers than any other member from British Columbia, and felt an intensive study of the situation in the Fraser Valley district should be made by the Federal Department of Agriculture.

J. W. Edwards (Conservative, Portneuf-Addington), asked Mr. McQuarrie what proportion of the total vote was for the enlargement of the experimental farm at Ottawa. He felt the central farm at Ottawa was entirely too small.

Mr. Edwards recalled that if the sum which was asked for the Booth farm, lying adjacent to the experimental farm, was paid, it would mean an expenditure of \$150,000. The owners of the Booth farm were demanding \$600 per acre for the property. The minister said, however, that if they would not accept a lower figure he thought the purchase should be referred to the exchequer.

The item of \$1,800,000 for experimental farms then carried.

Test Farms Proposed

With View To Promoting Electrification Of Rural Areas

Winnipeg.—The establishment of a dozen electrical test farms in Manitoba is proposed by representatives of power, agricultural and manufacturing interests here, and a general committee, with D. L. McLean, Deputy Minister of Public Works, at its head, is considering the matter. The idea of the proposed electrical test farms is that this will be a step towards promoting the electrification of rural areas.

Finance Minister Makes A Substantial Cut In Income And Sales Tax

Ottawa.—Before packed galleries and an eager attentive House, Hon. J. A. Robt, Minister of Finance, submitted his fifth budget.

Last year Mr. Robt had a ten per cent. reduction in all personal income tax rates to announce. Recently he announced another ten per cent. reduction in income tax rates with exemption of \$200 to those supporting dependent over 21 years of age incapable of self-support on account of mental or physical infirmity.

He announced a reduction to eight per cent. in the tax on corporations. The present rate is 8.1 per cent.

He announced a reduction of 25 per cent. in the sales tax, bringing the rate down from four to three per cent.

He estimated his tax reductions would amount to \$19,000,000.

So far, Mr. Robt's taxation changes created little surprise, but in an hour later in the sales tax, his expectation was general that he would announce a reduction both in the ex-

ise duty on cigarettes and in the import duty on liquors. But in neither case had Mr. Robt any reduction to announce.

Triffit proposals cover a pretty wide field. Ounces, woolsens and textiles are reduced in all personal income tax rates to announce. Recently he announced another ten per cent. reduction in income tax rates with exemption of \$200 to those supporting dependent over 21 years of age incapable of self-support on account of mental or physical infirmity.

Research Council To Be Asked To Investigate New System Of Wheat Grading

Ottawa.—The National Research Council, working in conjunction with the Board of Grain Commissioners, will be asked to investigate the feasibility of using protein content as a basis for grading wheat.

A motion by John Millar (Liberal, Progressive, Qu'Appelle), asking for a change in the method of grading grain, as amended by C. E. Boffwell (Liberal, Swift Current), carried in the House without division. The resolution also is referred to the agricultural committee of the House. Mr. Boffwell offered the amendment asking an investigation by the research council.

C. E. Boffwell (Liberal, Swift Current), pointed to the many difficulties in the way of establishing a system of grading based on protein content as recommended in the resolution. He then moved his amendment.

Hon. W. H. McMillan, Minister of Agriculture, supported the

amendment. He pointed out that every year during the last 40 years an off-year for grain had resulted in requests for a change in the system of grading. It was undesirable that the number of grades be increased to any great extent and the matter should have careful consideration from Government experts who could be called before the agricultural committee.

John Vallance (Liberal, South Huron), in seconding the amendment, said he would have preferred consideration of the problem be delayed until the wheat growing season, but he would have preferred consideration from Government experts who could be called before the agricultural committee.

E. J. Young (Liberal, Weyburn), asked the amendment.

John Vallance (Liberal, South Huron), in seconding the amendment, said he would have preferred consideration of the problem be delayed until the wheat growing season, but he would have preferred consideration from Government experts who could be called before the agricultural committee.

E. J. Young (Liberal, Weyburn), asked the amendment.

Flying Comes Here To Stay And Conquest Of The Air Goes On Apace In Canada

Canadian fliers who may be anxious to attempt a transatlantic flight this summer will have much difficulty in securing permission from the federal government, because transatlantic hops are not permitted upon the Dominion on account of the aerial tragedies of 1927.

Legislation will be passed at the present session whereby licenses will have to be secured by pilots desiring to fly across the Atlantic. It will be extremely difficult to secure such a license.

Flying in the Dominion last year was more costly in dollars and in human life than ever before, no fewer than eleven pilots having been killed in flying accidents and yet no records were attempted or set by Canadians.

Flying has come to Canada to stay. It was born of the war when Col. William Avery Bishop, V.C., won every decoration possible for conspicuous gallantry and devotion to duty in shooting down seventy-two enemy planes.

In these days of peace the conquest of the air goes on apace in the Dominion. The young men who resented the whiff of the war returned to Canada to earn their living as civil servants. But the spirit of war work survived, and in a small but active organization called the Royal Canadian Air Force the traditions of aerial navigation were carried on.

The young aviators trained in war days, looked to the civil department of government for employment. They were needed and within two or three years of the close of the war many of them were in the Royal Canadian Air Force, detecting forest fires, locating smugglers on the boundary, mapping out by photography the vast area of the hinterland.

Canada was quick to establish the necessary code of law for navigation of the air, and today the Dominion is safeguarded by a set of strict regulations governing the licensing of all mechanics, pilots, air hardware, international flying signals and the inspection of aircraft.

The most conspicuous work done during the recent crowded years of flying history has been the survey work in which Canada has led the world. Last year more than 400,000 square miles of Canadian territory were photographed and mapped with an accuracy which would have required years and millions of dollars if done in the old way.

Parliament acknowledged Canada's future in the air was assured by providing \$3,000,000 last year for air development. Cities are being encouraged to provide future air harbors, technical advisers from Great Britain have visited the Dominion to make recommendations for the future linking of the Empire by airways, and the postoffice department is taking the initial steps toward what will be an Atlantic-Pacific air route.

Red Tied In France
A girl living in Niagara, France, has refused a marriage license because she has never been officially born. She applied for a birth certificate, which is required before a marriage license can be issued, and the officials searched the records, but could find no trace of her birth having been entered. Her parents had apparently neglected to register her birth. She was informed that officially she was not born, so this wedding had to be postponed.

Passenger: "Porter, is this a through train?"
Porter: "Nawwah, she's just done commenced, cab!"

A hair from a man's head is slightly heavier than a woman's hair.

"Well, can you hear the murmur of our souls?"
"No, you are mistaken. It is my stomach. I have indigestion."—Fleming's Bile Beans.

W. N. U. 1721

Fisheries Of Alberta

Smaller Catch Is Reported For 1927 Over Previous Year

The fisheries of Alberta were not so active last year as in 1926, when a catch of 7 1/2 million pounds netted the fishermen \$750,000, an increase over 1925 of \$250,000. Estimates of the total 1927 catch are placed at about six million pounds, with prices running about the level of 1926. The Alberta fishing activity depends largely on the production of the Manitoba lakes. The chief markets for the fish are New York and Chicago, and the Manitoba fishing companies fill these needs. If the Manitoba catch falls off, greater activity is necessary in Alberta, but if the Manitoba fisheries are active, Alberta is left with a smaller demand to fill. During the past year, a whitefish hatchery was built on Lesser Slave Lake, which, with Lake Athabasca, are the chief sources of supply.

Ship Carries Air Taxi

Passengers On West India Cruise May Take Side Trips In Plane

Passengers who sailed from New York on the North German-Lloyd liner Columbus for a cruise to the West Indies may, they say, take side trips by plane. When the vessel, which was chartered by the German government, arrived in the West Indies, it carried aboard the plane a plane silver and black Junkers hydroplane. The pilot of the plane is Walter Hagen—not the golfer, but a German aviator. On the metal side of the air taxi is lettered its name, Clio. Trotter. Hagen declared that fares for the air-ride were well below \$1 a minute.

Journalists' Association

Paris-Inspired
One is immediately intrigued by its exquisite femininity. This stunning Parisian model No. 1702, fashioned of Creme de Menthe chiffon, derived distinction from its detail in cut. The bodice fits snugly over the hips, adding a loose tail behind at back to vary the smartness, and silver metal shoulder straps extend around the deep open neckline at the back. The skirt is made in three tiers with the seilage used for the edge of each tier, and loose hanging circular panels with pleated edges furnish the new little details to flatter to the waist.

No. 1702 is in sizes 16 years, 36, 38, 40 and 42 inches bust. Also 36 requires 6 1/2 yards of 36-inch or 34 1/2 inches 40-inch material, and 1/2 yard lace. Jacket included. Price \$25 cents the pattern.

Our Fashion Editor, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book, 10 cents the copy.

Co-Operation Between Railways

Two Transcontinental Systems Will Stand Together In Promoting Welfare Of Dominion

Wholehearted co-operation between the Canadian Pacific Railway and the Canadian National Railway is assured in everything that will make the greatness of Canada, E. W. Beatty, president of the C.P.R., and Sir Henry Thornton, president of the C.N.R., declared at Engineer's Club, Montreal.

The occasion was a presentation dinner to the staffs of both roads, who are the greatest of Canada, E. W. Beatty, president of the C.P.R., and Sir Henry Thornton, president of the C.N.R., declared at Engineer's Club, Montreal.

"Something has been said of the co-operation between the two railways during the mining congress," said Mr. Beatty, "and it has been talked of as though it was something to marvel about. It is not. In anything that is of common interest to the country and the railways you will, I think, be able to find the Canadian National and the Canadian Pacific Railways joining in support of that effort, whatever it may be."

On the question of co-operation, Sir Henry Thornton had the following to say: "Let me say that we in Canada are too few in numbers to quarrel, and too poor in capital to fight each other. The progress of our country will be best assured by the co-operation of all institutions within our bounds and by the joining of each section of our country in promoting the welfare of the Dominion. We shall stand shoulder to shoulder with the Canadian Pacific Railway in the protection that is necessary to preserve the revenues of our great transportation system."

Hinders Trade With India

H. R. Foushee, Canadian trade commissioner at Calcutta, writes that one factor that militates against the expansion of Canadian exports to India is the reluctance of Canadian manufacturers to send representatives to visit the markets of India and Ceylon and the Middle East generally. Similar complaints have been made by other trade commissioners.

If Austin, he could be transported across the Atlantic Ocean, it would fill up all the space between the United States and Great Britain.

Many a man's financial goose has been cooked in a jack pot.

For Better Understanding

Sir Hugh Denison Deprecates War Talk In British And U.S.

Sir Hugh Denison, former commissioner for Australia in the United States, pleading before the English Speaking Union for a better understanding between the United States and Great Britain, cautioned his hearers not to take Mayor Thompson of Chicago seriously.

Recalling the Chicago mayor's threats to burn school books and his other anti-British attitudes, Sir Hugh declared that Mayor Thompson no more represented the U.S. feeling than a J. Cook, secretary of the Miners' Federation, represented England.

The former commissioner also made reference to Rear Admiral Plunkett's recent speech on the possibility of war between Great Britain and the U.S. and urged the people of both countries to weigh such matters in the proper balance.

He urged steps to bring about closer relations through visits of statesmen, mentioning particularly Senator Borah and industrialists of the two countries.

"They would find much in common," he said, and by exchanging views would do a great deal in smoothing out the little misunderstandings which arise occasionally."

Declares Columbus Was Buried In America

Askes Sent To Mexico In 1542 Says

Where is Christopher Columbus buried? That is the question.

Historians have been telling the world that his ashes are buried in Seville, Spain. But Senor M. A. Cocco, who attended the Pan-American road convention, takes issue by asserting the remains are buried in America—specifically under the great cathedral in Santo Domingo City.

Senor Cocco says that the wife of Diego Columbus, son of the discoverer, petitioned Charles V. to remove the ashes of the discoverer from Valladolid, Spain, to Santo Domingo, Peru, in 1542. The remains were granted for the remains to be moved to Hispania America, according to his story, and in 1542 burial was effected under the altar of the cathedral in Santo Domingo City.

Many a man's financial goose has been cooked in a jack pot.

Canadian Sheep Breeders View The Future With The Utmost Confidence

Benefit Of Inoculation

Effect Of Inoculation Shown On The Yield Of Legume Crops

At several of the Experimental Farms in Canada tests have been made on the effect of inoculation on legume crop yield where legume crops were absent from the soil or present in insufficient numbers, and the results are summed up in a pamphlet on "Legume Inoculation" written by the Dominion Agricultural Bacteriologist. In some cases the increase in yield resulting from inoculation was comparatively slight, but in many instances they were striking. At the Kapuskasing Experimental Station two years after inoculating, the inoculated alfalfa seed produced 3 tons, 1,665 pounds of dry matter against 1 ton, 987 pounds produced from untreated seed. Results at the Beaveridge, Alberta, station were much more striking. On acreage sown in the year of seeding on that station the aggregate crop of two years from inoculated red clover seed was 162 pounds per acre as compared with only 350 pounds from uninoculated seed. For alfalfa the comparison was 4,268 pounds with 640 pounds per acre for sweet clover. The pamphlet may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

A Valuable Fertilizer

The Relative Value Of Fresh and Rotted Manure

Weight for weight rotted manure is more valuable than fresh manure because it contains percentages of plant food and has these elements in a more available condition. However, according to a new bulletin on "Manures and Fertilizers" written by F. T. Shutt, Dominion Chemist, and L. E. Wright, the losses in rotting frequently outbalance the benefits. Generally speaking, the sooner the farmer gets his manure well stirred into or onto the soil the better. But there are times when the rotting of manure is an advantage. It is well suited for light and sandy soils as it tends to make them more compact and retards the effect of moisture. On clay and heavy loams fresh manure is best as it improves their physical condition by opening them to the air and making them more friable. Fresh manure is also preferable for crops which have a long season of growth. With crops having a short period of growth and where early marketing is a consideration rotted manure with its quickly available plant food is best. It should be remembered that when rotting manure in a large heap the mass should always be kept compact in order to reduce losses to a minimum. The bulletin may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Flower Improves With Age

Carnation Exhibited At London Show Changes Color Instead Of Fading

A new carnation named Daphne which improves as it gets older was one of the exhibits at the Royal Horticultural Society show. It is a medium-sized bloom, mauve in color, striped with heliotropes. "As it becomes older," the grower said, "instead of fading, the tones change to a delicate French grey, even more beautiful and artistic than its original coloring."

Another feature of the show was a little flower, Daphne Indica Rubra, which is said to be the sweetest smelling in the world.

Cause For Worry

Mrs. Jones found Mrs. Smith, the other wife, in tears. "What's the matter?" she asked, anxiously. "I'm worrying about Jim," said Mrs. Smith. "He's been trying all week to tell our cat, and I've no resource he took her up 2,000 feet in his plane. He said he would drop her over the side."

"Well, what is there to worry about?"

"Lots," exclaimed the frantic woman. "Jim isn't home yet, and the cat."

Lady (intervening prospective mother-in-law) may tell you that we are vegetarians.

Chief (anxious to be engaged): I've attempted that church all my life, mum.

The movie "Anne Laurie" was filmed in England and Scotland.

"My Old Kentucky Home" was composed by Stephen C. Foster.

VICKS
VAPORUB
OVER 12 MILLION JARS USED YEARLY

COPYRIGHT, CANADA, 1925

It was Bill Larsen, the Swede, who conceived the idea of visiting the new house, and to this end organized a fishing party one Sunday morning in the spring of the year. English salmon abounded in mountain trout and it was easy to get a party together to go out. They could ask permission to boil a kettle and in the way get in to see the house.

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

[illegible]

And there is the final irony that the world at large will take from the exile of Trotzky all sorts of valuable lessons of the exact kind which neither he nor the Soviet tyrants will want it to take. — New York Post.

Zam-Buk soon allays the inflammation and swelling, allays the burning pain, and soothes the maddening irritation. Where skin is broken, festers or ulcerated Zam-Buk is doubly valuable because of its great healing and antiseptic power.

took the monthly rate from Mrs. McMann. "What's bittin' you? Go yourself if you want to—who's holdin' you back?—but what's the call for abusin' us because we don't want to stand up and stop bullets. My old granddad fought in the American war, and he got his fill of it, I'll say!—lost an eye and a leg, and four dollars a month of a pension from his own government! It don't look like a safe proposition. How do you know who's right? Your British Empire wasn't so darned right when she had the little run-in with the United States. How do you know she's right this time?"

and the pedestrian has what's left.

Pleasantly flavored, easy to take, children like

Both these parties will follow practically the same itinerary, landing at Havre and motoring thence to Rouen, through the Canadian battlefields by way of Neuve Chapelle, Amiens, Doullens, Arras, Vinny Ridge, the Somme, Lille, Tournay, Mons, Cambrai, St. Quentin, Compiègne to Paris where several days will be spent, then by way of Chateau Thierry to Rheims, Verdun, Luxembourg and Treves, Cologne, Aix la Chapelle, Brussels, Antwerp, Amsterdam, The Hague, Rotterdam, and then by steamer to Harwich from where the party will make a circular tour of England and Scotland.

Today most of these areas are filled with settlers. The stupendous change that the years have brought is clearly pictured in the latest edition of the Vermilion Map Sheet, located seventy miles east of Edmonton, now on the basis of the Topographical Survey, Department of the Interior, Ottawa. The wilderness that was has been made to blossom into something distinctly more profitable than the rose. An area of eighty-four miles east and west by forty-eight miles north and south is, except in three wooded townships, settled to the extent of one farmstead to the quarter-

American medical association meeting by Surgeon General Hugh S. Cumming, of the United States public health service, was advocated by Dr. Mayo as a means of casting off the "secrecy and mystery" in which research scientists have shrouded their experiments on cancer.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and eff

Minard's Liniment for asthma.

So far nobody has been able to raise the chinchilla successfully in captivity as these animals are very quarrelsome and usually kill each other or the young.

A Texas chemist has declared the material value of the average human being to be 98 cents.

Acid tomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full

Mrs. Barwis, of Innisfail, is
visiting at the home of her
daughter, Mrs. F. Sibley.

Mr. and Mrs. Lyon, left for
their home at Portage la Prairie,
Tuesday morning.

D. McEachern's and G. Tyler's
rinks were the winners of the
novelty hospital.

Mr. Bonn, sr., and son, Mark,
were in by car from Atlee, Wed-
nesday.

The masquerade is the big
dance event of the year. Most
your friends there.

"Tell It To The Marines," is a
picture that the whole family
can enjoy. It is generally re-
cognized as being one of the
best photoplays produced. You
do not want to miss this show.

See that you get your ticket
for estimate with every \$5 pur-
chase.—Star Cash Grocery.

Mrs. A. L. Caldwell of Gabri,
was a visitor at the home of
her parents, over the week end.

G. L. Brown, who was form-
erly drug store merchant here,
was in town on Friday last.
George has evidently not been
working so strenuously as
when he was here, and has put
on quite a lot of weight.

The March meeting of the
Woman's Missionary Society
will be held at the home of
Mrs. T. Rowles, Wednesday,
the 21st, at 3.00 p.m. All wo-
men of the Church invited.

What Is Better Seed?

The Seeds Act Defines Five
Grades of Seed.

The Dominion Seeds Act,
1923, which controls the sale of
seed, requires same to be sold
under one of the following

grades: Registered, Extra No.
1, No. 1, No. 2 and No. 3. Seed
grading below No. 3 is design-
ated "Rejected" and sale of
such is prohibited. All grades
shall consist of seed which shall
(1) within comparative latitudes
for different grades be well ma-
tured, plump, sound, sweet,
and well cleaned and graded to
remove small, shrunken, immat-
ure or broken kernels and in
art matter; (2) be at least equal
in general appearance to stan-
dard grade samples that may
be fixed from season to season;
and (3) comply with minimum
standards of purity and germi-
nation set forth in tables.

Registered seed, which is the
highest grade, is of pure vari-
ety, free from all weed seeds or
other kinds of grain and of
high germination. Such seed
is sure to give better results
under field conditions, higher

yields may reasonably be ex-
pected and more uniform ma-
turity, resulting in greater pro-
fits for the producer. Extra
No. 1 and No. 2 respectively
come next. These grades of
seed can safely be recommend-
ed. The lower grades permit
the presence of more weed
seeds, other crop seeds and
lower germination.

Good seed is cheap at any
price and poor seed is dear at
any price. Good seed never
stops paying you; you never
stop paying for poor seed.
Weed seeds introduced into the
soil through poor seed improv-
erish the soil, reduce crop
yields, increase harvesting and
marketing costs and require
much hard work and expense
to eradicate.

The best for the West is
none to good. Use better seed.

G. M. Stewart,
District Inspector, Dominion
Seed Branch, Calgary.

It Was A New Ford

An old man with his liveried
chauffeur was bowling along in a
\$5000 car down the highway
at 55 miles an hour. Suddenly
another car whizzed past. The
old man asked the chauffeur
what kind of a car it was.

"One of those new Fords,"
was the reply.

"Well, James," the man said
"speed up and pass him." "We
can't be humiliated by a Ford!"
The chauffeur opened up, but
it was all the big car could do.

to come abreast of the Ford. It
could not master the speed ne-
cessary to pass. The driver of
the Ford leaned out:

"Say, mister, do you know
how anything about this new
Ford?"

"Why, something. What's
the matter?"

"Well, tell me how to get the
darned thing out of second."

We are agents for all mag-
azines and newspapers. Give
